***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 44 drawn to an implantable device to detect arrhythmia and generate a message, classified in class 600 , subclass 509.
- II. Claims 11- 21, drawn to an implantable shocking device, classified in class 607, subclass 9.
- III. Claims 22-32, 45 drawn to a method of testing using a patient request, classified in class 128, subclass 898.
- IV. Claims 33-43, drawn to a method of shocking a patient, classified in class 128, subclass 898.
- V. Claim 47, drawn to a activator, classified in class 607, subclass 31.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II, III have separate utility such as as a testing device , a shocking device or an activator for controlling other implantable devices. See MPEP § 806.05(d).

Inventions I, II , V and inventions II and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another

materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the detection means can detect a physician delivering the signals as opposed to the patient.

Inventions II and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II and IV have separate utility such as strictly shocking or testing methods. See MPEP § 806.05(d).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
